BUR FILES REVEAL A .22 CAL IVER JOHNSON SERIAL H18602 REPORTED
DESTROYED 7-00-68 BY PD LOS ANGELES CR 67 021065
NO WANTS

CII PROPERTY IDENT UNIT MC GILLIVARY AM/RM

This document is truly damning. It shows H18602 (the Jake Williams gun) was destroyed July '68. But Waffer testified @ Sirhan's trial in Feb '69 that the gun he used (H18602) is still available. Waffer used this gun for comparison test bullets (Pco 55) on 6-6-68 and on 6-11-68 for sound & tattoo pattern tests.

*Since this document reports H18602 destroyed 7-68 it couldn't have been available when Waffer testified Feb '69. - And so - LAPD issued a statement that this teletype is wrong - that the gun was destroyed 7-69

Part #14

TEST FIRINGS

Test firings were conducted on June 11, 1968, using a weapon and ammunition supplied by the Los Angeles Police Department as being of the most nearly identical manufacture possible to that of the fatal weapon. An area adjacent to the firing range on the Los Angeles Police Academy was utilized. Personnel consisted of Drs. Holloway and Noguchi, Mr. DeWayne Wolfer and Sgt. William J. Lee. Preliminary studies were with a target composed of a single layer of muslin over 3/8 inch (9 mm) gypsum board. The muzzle was perpendicular to the target unless otherwise noted.

A firm contact firing shows a circular defect about 3/8 inch (9 mm) in diameter, surrounded by a concentric zone of powder deposition about 7/8 inch (22 mm) in diameter and sometimes having a multi-laminar configuration at the periphery. These are on the outer surface of the muslin. Also evident on the under surface is a concentric zone of pale soot deposition about 3 inches (7.5 cm) in diameter.

At a 1/4 inch muzzle distance, there is a 5/16 by 1/4 inch (7.5 x 6 mm) defect with transverse ripping of the fabric over a zone 1-1/2 inches (3.8 cm) in length and about evenly divided bilaterally. Also present is a concentric zone of dense, dark gray discoloration one inch (2.5 cm) in diameter with irregular "clouding" within a zone up to 2-1/2 inches (6.3 cm) in diameter. Several faint radial smudges are identified as corresponding roughly with the known land-and-groove characteristics of the test weapon.

A firing at 1/2 inch muzzle distance is similar in configuration except for the absence of ripping of the target fabric and absence of land-and-groove "puffs." Visually detected powder residue is present in a zone having a maximum diameter of about 6 inches (15 cm).

At one inch distance there is the usual central defect and dense but comparatively homogeneous smudging up to a radius of 1-5/8 inches (4.2 mm).

A firing at 2 inch muzzle distance shows fairly homogeneous but comparatively lighter smudging up to a radius of 2-1/4 inches (5.6 cm). Discrete tattoo particles are now seen in a central zone up to 7/8 inch (2.2 cm) in radius.

The 3 inch distance firing shows pale mottling of powder residue within a radius up to 2-1/4 inches (5.6 cm), as well as finely dispersed powder granules up to a radius of about 1-3/4 inches (4.4 cm).

At 4 inches there is a pale smudging zone up to 1-3/4 inches (4.4 cm) in radius. In sharp contrast, discrete powder tattoo particles are identified out to a radius as much as 2 inches (5 cm).

1

Q People's 58 is a black and white photograph,
2 People's Exhibits 56 and 57 are in color.

2

3

3 Could you tell us, sir, if there was a particular
4 reason so far as you were concerned or with respect to the
5 accuracy of your experiment why you required colored
6 photographs in 56 and 57?

4

5

6

7

A In the case of Exhibits 56 and 57 you were
8 dealing with an unknown.

8

9

MR. COOPER: With a what?

10

11

12

13

14

15

16

17

THE WITNESS: An unknown from the standpoint that we
do not know if, because of the tissue there, without seeing
it, whether or not it was actually there, so color indicates
that and not some other material. It indicates the basic
tattoo pattern and not some foreign material that is not
black, it might be blood or something else, so the
colored photograph is essential from the standpoint of
the body and the unknown tissue surrounding it at that time.

18

19

In the case of our experiment it is something
different.

20

21

22

23

24

25

26

Q BY MR. FITTS: At the time you performed the
particular firing experiment of which 58 is a photograph,
as illustrative, did you use the gun, People's 6 in evidence?

A No, we did not use this gun. We used a gun
which was the exact make and model and within a very close
serial number of this weapon. At that particular time
the gun was in the Court exhibits and was unavailable for us

X Q Now I noticed you said you used another
revolver similar in pattern, size and make and model to
People's Exhibit No. 6? (Exhibit 6 is the Sirhan gun)
A That is correct.
Q And have you since made a comparison between the
revolver that you used and People's Exhibit No. 6 that is
in evidence for the purpose of determining whether or not
this makes the same test pattern?
A This would be impossible. No, I have not.
The revolver was not available.
Q You say it wasn't possible to use the revolver
that was in evidence?
A It wasn't available.
Q Well, it was in evidence?
A Yes.
Q You could have gotten a court order?
MR. HOWARD: Argumentative.
MR. COOPER: Your Honor please --
THE COURT: What you meant to say was that you could
have applied for a court order. That is as far as you
could go, of course.
MR. COOPER: But wouldn't the Court take judicial notice
of the fact it would be granted?
THE COURT: Certainly.
Q BY MR. COOPER: Did you make an application for
a Court order?

A I asked for the gun to be released to me.
Q Whom did you ask?
A I asked the District Attorney's Office.
Q You mean they said "No" or that it would
be too much trouble?
A Well, it is hearsay. ?
Q Well, if he wants to object to it, he can.
A I was told that the gun would not be released
for any further tests until they had a Court order
approved by different counsel as such and there was never
any time that they could get it approved. That was my
understanding.
Q Now, is it your opinion, did you say, that
if you fired a test pattern of People's Exhibit No. 6,
and is the revolver you used still available?
A Yes, the revolver is still available.
Q In your professional opinion would that fire
the same test pattern as People's Exhibit No. 6?
A Yes, within the tolerances that I have
allowed.
Q What are the tolerances you have allowed?
A I have allowed in this instance a good double
of the air accuracies within the ranges of calculation,
and may I explain that?
Q Certainly.
A When I say approximately one inch, when you

asked who?

see file opening statement
