BAXTER WARD

Mr. Hal Marshall, Special Agent
Federal Bureau of Investigation
1110 Wilshire Boulevard
Los Angeles, California

Dear Sir:

In the course of an inquiry by the office of the Los Angeles County Board of Supervisors into certain aspects of the physical evidence at the Senator Robert F. Kennedy assassination, questions have arisen concerning certain FBI photographs. These photographs, purportedly taken by Special Agent Greiner and numbered E-1, E-2, E-3 and E-4, are captioned "bullet holes".

If these were, in fact, bullet holes, it could be inferred that more than one gun was fired in the pantry during the assassination. Mr. Allard Lowenstein, Ambassador to the United Nations, among others, has maintained that a possibility exists that another assassin was present. Mr. Lowenstein and other critics of the official version have referred to the above photographs as representing the official opinion of the FBI inasmuch as the captions are unequivocal in stating "bullet holes".

If the captions had said possible, probable, or apparent bullet holes, one could assume that no precise examination had taken place at the time the photographs were taken. However, the captions would lead one to believe that a determination had been made by someone with the requisite knowledge and skills.

The dilemma we are faced with is that the photograph captions are being used as evidence of the official FBI position in the absence of any other official stated position.

If more bullets were fired within the pantry than Sirhan Sirhan's gun was capable of holding, we should certainly find out who else was firing. If, in fact, the FBI has no evidence that the questioned holes were bullet holes, we should know that so that the air may be cleared.
